ClearPath works to accelerate conservative, market-based clean energy and industrial innovation. The U.S. has an enormous role to play in the global effort to lower carbon dioxide emissions. With strategies focused on affordably meeting the growing global demand for reliable and clean energy, while strengthening our economy, we want the next generation of technologies to be created in America.

"ClearPath, a conservative clean energy non-profit."

"A Washington, D.C.-based nonprofit working to develop and advance conservative policies that will accelerate clean energy innovation."

"A conservative advocacy group that backs nuclear, hydropower and carbon capture as ways to curb greenhouse gases."

"[ClearPath] works to accelerate conservative clean energy solutions."

ClearPath works to advance next generation innovation for nuclear power, carbon capture for natural gas or coal, energy storage, hydropower, geothermal and heavy industry. These technologies are essential to quickly and affordably reducing CO2 emissions across sectors of the global economy.

The U.S. accounts for 14.6% of Global Emissions

Emissions by Economic Sector

Mission Statement

ClearPath’s mission is to develop and advance policies that accelerate breakthrough innovations that reduce emissions in the energy and industrial sectors. To advance that mission, we develop cutting-edge policy solutions on clean energy and industrial innovation. An entrepreneurial, strategic nonprofit, ClearPath (501(c)(3)) collaborates with public and private sector stakeholders on innovations in nuclear energy, carbon capture, hydropower, natural gas, geothermal, energy storage, and heavy industry to enable private-sector deployment of critical technologies.
